Environmental Social Policy Vision on OHS

(ESP, para 21)

“..providing safe and healthy working conditions and putting measures in place to prevent accidents, injuries and disease; avoiding activities involving forced labor and harmful or exploitative forms of child labor; having good human resources management; and having a sound labor management relationship based on equal opportunity, fair treatment, nondiscrimination, freedom of association, right to collective bargaining and access to a workplace grievance redress mechanism, consistent with national law ..”

Environmental and Social Framework Requirements

(ESS1, Section E: Health and Safety, para 51)

Assess health and safety risks to Project workers and communities

Put in place **measures to prevent** accidents, injuries and disease

Where avoidance is not feasible, **minimize adverse risks** and impacts of the Project on health and safety

Provide relevant **information and training** to Project workers and affected communities

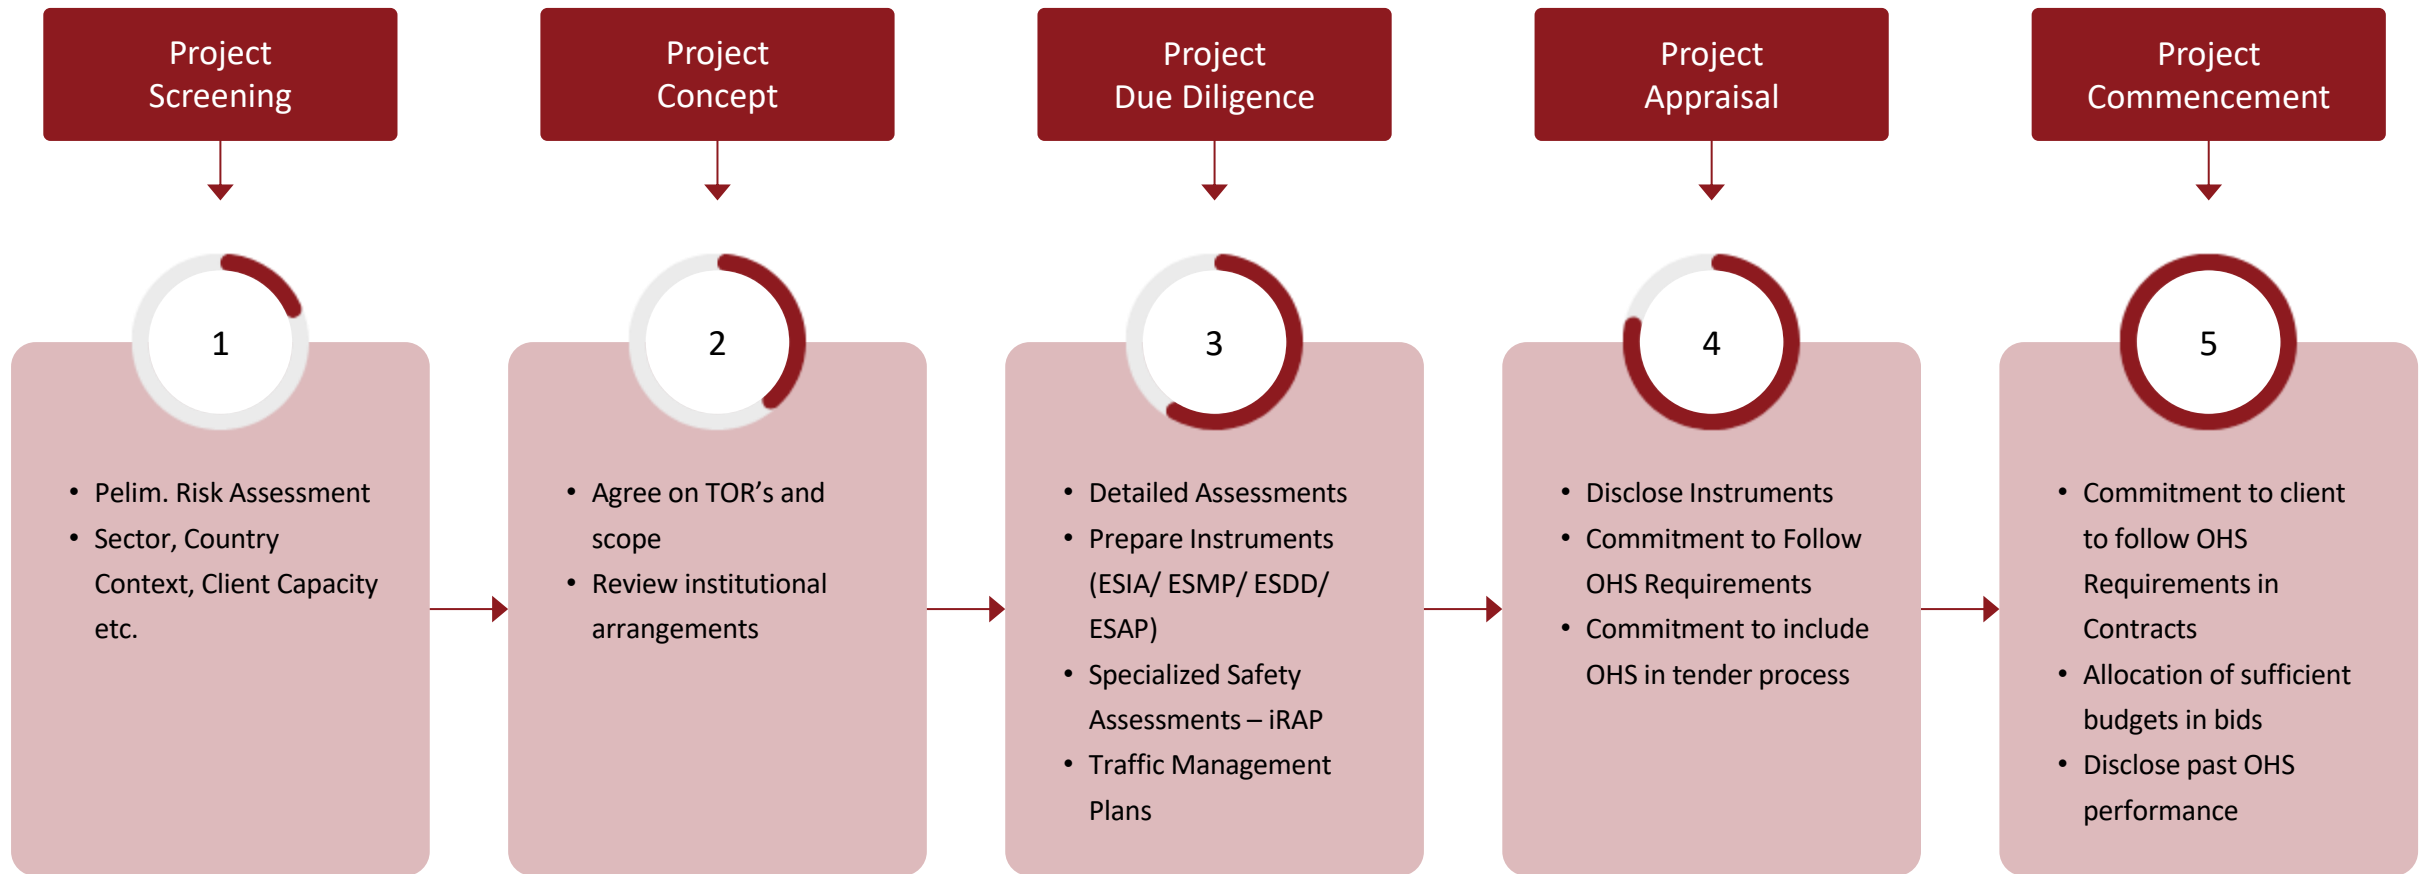

Document and report on accidents, diseases and incidents

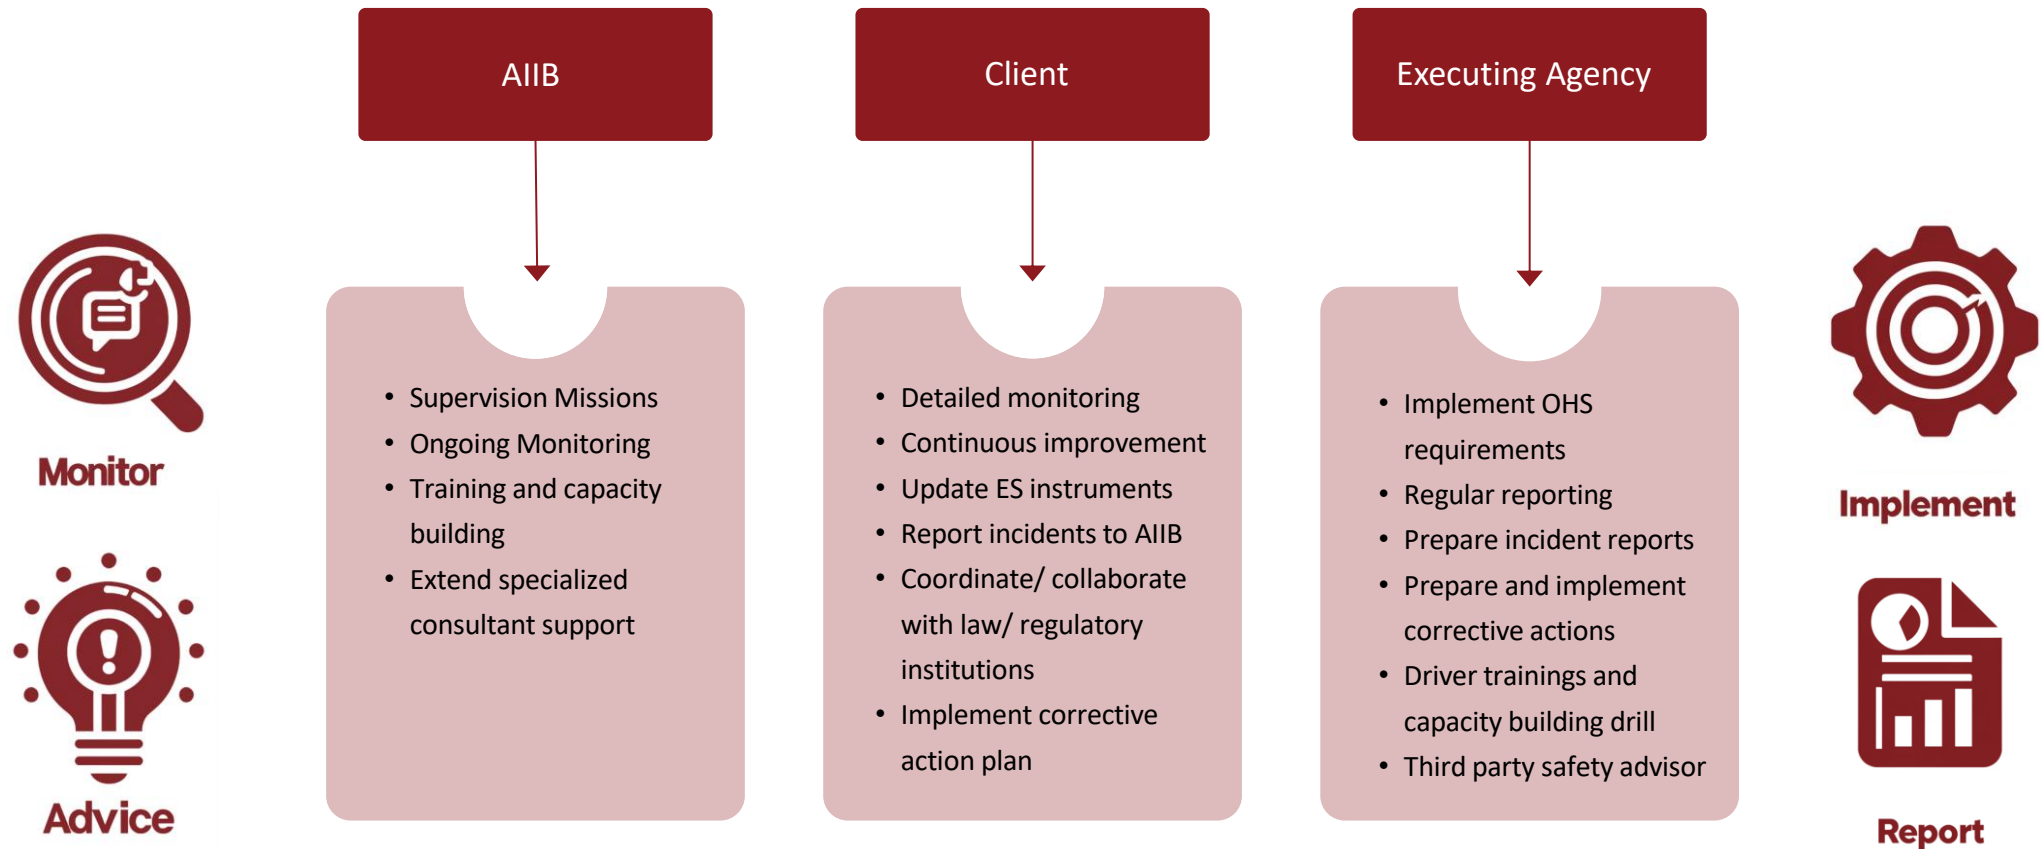

Put in place a system for **regular review** of OHS performance

Apply the relevant health and safety provisions of **internationally recognized best practice standards**, such as the World Bank Group EHSs and, industry-specific EHSs, to the Project
